**\*Length  
Average:**  
85% at 6ft+

\*\*Many factors affect the color of each wood plank. Therefore, each item number is assigned a level of color variation: *low, medium, or high*. Many factors cause the degree in variation, such as, how it was sawn and dried, specific treatments and how the wood accepts stains. Each board is unique and it's completely normal to see the variations.
